

Preconstruction Primers

Zero VOC

The Fathers of Zinc Technology.

Carboline founder Stanley Lopata developed and patented the world's first self-curing zinc primer. For over half a century, Carboline has remained the leader in zinc technology that still continues to deliver outstanding corrosion protection around the world.

Carboweld® 14 WB

Product Details

Carboweld 14 WB is a fast drying, 2-pack, pre-construction primer with a high zinc content for steel substrates. It performs well when used as a shop/yard primer for corrosion protection during fabrication. It provides outstanding cathodic sacrificial protection and thus prevents corrosion of the underlying steel, like galvanizing. It contains 88% zinc dust by weight in the dried film, has zero VOCs, and a flash point of zero. This weldable zinc-rich primer is an excellent choice for use as a shop primer as it provides outstanding corrosion protection. It is great for use in industrial, marine, and process environments.

Features

- › Fast dry to handle times
- › Ultra-high zinc content (88% by weight)
- › Zero VOC, zero flash point
- › Delivers outstanding corrosion protection
- › Superior undercutting resistance
- › Good coverage per gallon
- › Water-based pre-construction primer with good weldability

Carboweld® 9 WB

Product Details

Carboweld 9 WB is a fast drying, 2-package pre-construction primer, with a more economical level of zinc content which still affords excellent corrosion protection. It performs well as a shop/yard primer for corrosion protection during the fabrication phase of projects. It provides cathodic sacrificial protection and thus prevents corrosion of the underlying steel, similar to galvanizing. It contains 81% zinc dust by weight in the dried film. This waterborne product also has zero VOC content and a zero flash point. It can be used as a shop primer in industrial, marine, and process environments when weldability and corrosion protection are necessary.

Features

- › Fast dry to handle properties
- › High zinc content (81% by weight)
- › Zero VOC, water-based formula
- › Provides good corrosion protection
- › Excellent undercutting resistance
- › Pre-construction primer with excellent weldability
- › Good coverage per gallon
