

Healthcare Industry

The Sanitile line of products are designed to deliver outstanding protection against chemicals and abrasion in all Healthcare Facility environments. From hospital waiting rooms, hallways and operating areas to long-term care suites, Sanitile systems provide a level of performance and quality unsurpassed by any paint product on the commercial market.

The Sanitile series has a long history of performance as the formulation was developed from Eisen-Heiss paint, used for over 60-years in a variety of applications requiring long-lasting performance. Sanitile systems provide a tile-like surface creating a hard finish that protects walls and ceilings against the aggressive attack of chemicals and cleaning agents present in many of today's environments. All Sanitile products can be used to help gain LEED Certification.

ADVANTAGES

- Low Odour
- Excellent Yellowing Resistance
- Satin, Semi and High Gloss Finishes
- Brush and Roll Application
- Tintable to Match Custom Colours
- Low VOC
- Quick Drying
- User Friendly
- Outstanding Colour Retention

APPLICATIONS
